

SYED MISBAH UDDIN

AI/ML Developer | Python | Machine Learning | Full-Stack Development

☎ +92 320 1220509 • ✉ syedmisbahuddin516@gmail.com • [Portfolio](#) • [LinkedIn](#) • 📍 Karachi, Pakistan

PROFESSIONAL SUMMARY

Results-driven Computer Science student (graduating 2026) with hands-on experience in Machine Learning, Python development, and full-stack web technologies. Proven ability to build end-to-end solutions including ML classification models, IoT systems, and responsive web applications. Certified in Generative AI (Google) and completed Software Engineering simulation (JP Morgan Chase). Seeking remote AI/ML Developer or Software Engineering opportunities to apply technical skills and contribute to innovative projects.

TECHNICAL SKILLS

AI/ML & Data Science	Machine Learning (Scikit-learn) • Data Preprocessing • Pandas • NumPy • Generative AI • Model Training & Evaluation • Classification Algorithms
Programming	Python • C++ • JavaScript • SQL
Web Development	HTML5 • CSS3 • Bootstrap • JavaScript • jQuery • REST API • Responsive Design
Tools & Databases	MySQL • H2 Database • Git • Arduino • IoT Integration • Kafka (Basics)

CERTIFICATIONS

Generative AI for Educators Certificate | Google & MIT

Completed: May 2025 | Score: 92/100 | Certificate ID: 386585270

Software Engineering Job Simulation | JP Morgan Chase & Co. (Forage)

Completed: April 2026

Completed practical tasks: Project Setup • Kafka Integration • H2 Database Integration • REST API Development • REST API Controller Implementation

EDUCATION

Bachelor of Science in Computer Science

Iqra University, Karachi, Pakistan | 2022 – 2027

Relevant Coursework: Machine Learning, Data Structures, Database Systems, Software Engineering, Web Development

• Secured **78.2 percentile** in **HEC National Skills Compatibility Test (NSCT)**

KEY PROJECTS

Income Level Classification Model | Machine Learning

Python, Pandas, Scikit-learn, NumPy

- Built supervised ML model to classify income levels using U.S. Census data (32,000+ records)
- Performed data preprocessing: handled missing values, encoded categorical features, normalized numerical data
- Achieved 85%+ accuracy through feature engineering and hyperparameter tuning

Smart Electricity Theft Detection System | IoT + Database

MySQL, Python, IoT Sensors

- Designed intelligent system to detect unusual electricity consumption patterns and flag potential theft
- Developed MySQL database schema to store and track 10,000+ usage logs with timestamps
- Implemented pattern recognition algorithm to identify anomalies in consumption data

Hospital Management System | Full-Stack Web Development

HTML5, CSS3, Bootstrap, JavaScript

- Designed responsive multi-page hospital website with 8+ interactive pages
- Implemented patient appointment booking system with form validation using JavaScript
- Created mobile-responsive UI using Bootstrap grid system (tested across 5+ devices)

Line-Following Robotic Car | Embedded Systems

Arduino, IR Sensors, C++

- Built autonomous robotic car using IR sensors for line detection and path following
- Programmed Arduino microcontroller for motor control and sensor data processing

LANGUAGES

English: (Written & Spoken) • **Urdu:** Native

CAREER OBJECTIVES

Seeking an on-site internship opportunity in AI/ML, Python Development, or Software Engineering within my city, where I can apply my machine learning and data science skills to solve real-world problems, develop practical applications, and gain hands-on industry experience in a professional environment.
